EXPERIENCE

CPS Academy | Remote

Software Engineer

Jan 2026 – Present

- Operate a Next.js/Strapi platform for 4,500+ students: ~414K requests/month, <0.1% errors, sub-second p50.
- Resolve live latency and runtime issues via Vercel and Railway analytics; 95 Lighthouse accessibility, 92 SEO.
- Launched a new course platform alongside the existing one, with SSLCommerz payments and Bunny Stream delivery for large-file lectures.

Software Engineer Intern

Jul 2025 – Dec 2025

- Rebuilt the user leaderboard on live Codeforces and VJudge data; merged duplicate user-data calls into one endpoint.
- Shipped 60+ features and bugfixes on schedule through code reviews and sprint planning; promoted to full-time.

EDUCATION

BSc in Software Engineering - Islamic University of Technology (IUT)

2023 - 2027

HSC - Ananda Mohan College, Mymensingh | SSC - Mymensingh Zilla School, Mymensingh

PROJECTS

Prantik AI - Epidemiological Surveillance Platform

★ Finalist · SciBlitz & Infinity AI BuildFest 2026

Next.js, FastAPI, Neo4j, PostgreSQL/pgvector, Docker Compose, Nginx, CrewAI

- Flag likely outbreaks from anonymized health-worker reports; a Neo4j graph engine explains each risk score.
- Ran 18 services under Docker Compose with health-check-gated startup ordering behind an Nginx reverse proxy.
- Scheduled a CrewAI pipeline pulling 13 health data sources nightly, clustering signals and refreshing dashboards.
- Shipped an E2E-encrypted local LLM with env-driven cloud/local switching, Bangla speech recognition, and OCR.

Nimbus - Secure File Sharing & Self-Hosted Object Storage

Django, PostgreSQL, MinIO (S3), Docker, Nginx, systemd, GitHub Actions, Azure

- File-sharing platform with password-protected shareable links, scheduled expiry, and an upload dashboard.
- Automated CI/CD with GitHub Actions: tests run on every push and green builds deploy to Azure.

PicoDB - File-Based SQL Simulation Library · C++, SQL, CMake, CSV

- Wrote a SQL engine in C++ from scratch over CSV files: parser, CRUD, DDL, joins, keys, sub-query filtering.
- Managed a multi-file CMake build and integrated an XOR cipher for at-rest data encryption.

Kumo - AI-Enhanced Coding Assessment Platform · FastAPI, Docker Compose, Piston, Gemini, Prisma

- Coding assessment platform standardizing CS labs with a RAG assistant and LLM-code plagiarism checks.
- Ran untrusted submissions in per-run Piston containers with capped CPU and memory across 7 Docker Compose services.

Headroom - Context Compression Proxy · Python, FastAPI, httpx, tiktoken, Paritok

- Drop-in proxy compressing agent context by window occupancy; kept 5/5 constraints at turn 100 vs 0/5 baseline.

Project Baksho - Microservices Crowdfunding Platform · Spring Boot, Eureka, FastAPI, Docker Compose

- Polyglot microservices with a Spring Boot gateway and Netflix Eureka discovery behind a single entry point.

ACHIEVEMENTS

- Winner, GABA Hackday 2026 - [The Deposition](#), an AI detective interrogation game (Gemini API, Pixi.js).
- Finalist, SciBlitz AI Challenge 2026 - Top 30 of 1,000+ teams (IEEE CUET SB); presented **Prantik AI** on-site.
- Finalist, Infinity AI BuildFest 2026 - From 600+ teams for **Prantik AI** (CloudCamp BD & BRAC University).
- Top 25, bdapps Innovation Summit 2025 - From 1,300+ entries (Robi Axiata PLC), AI diabetes-care platform.

OPEN SOURCE CONTRIBUTIONS

Thysrael/Horizon | Python, Ollama | 8,500+ Stars

- Merged contribution, adding Ollama support to an AI news tool, enabling free, fully local LLM inference.

sakhadib/Geon · Collaborator · IUT developer community

- Contributed feature development on a fellow student's open-source project via review-driven collaboration.

SKILLS

Languages: Python, C++, TypeScript, JavaScript, Java, SQL, Bash Frontend: Next.js, Tailwind CSS, HTML/CSS

Backend: FastAPI, Django, Node.js, Express.js, Spring Boot, Strapi, REST APIs, JWT Authentication

Databases: PostgreSQL/pgvector, MySQL, Oracle, MongoDB, Neo4j, SQLite, Prisma ORM

Infrastructure & DevOps: Linux, Docker, Docker Compose, Nginx, systemd, CI/CD, Automated Testing

Tools & Platforms: Git, GitHub Actions, Claude Code, Vercel, Railway, Azure, MinIO (S3)

AI Engineering: AI SDK, RAG, Vector DBs (pgvector, ChromaDB), LLM APIs (Gemini, OpenAI), Ollama / local inference
